Regarding storage stability or corrosion characteristics data, neither of those data requirements include a full analysis of the contents of the product in the container so they are not informative regarding the potential migration of a component of the container into the product itself.

Subject: RE: PFAS Anvil Question

Hi Rhina,

I've added Kerry Leifer to see if he might have some suggestions for this question. Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

We could address that similar to some of the others –

Ex. 5 Deliberative Process (DP)

*Based on the ACRC letter that says “Over the life of the program [over 25 years], HDPE container manufacturers have supplied significant volumes of fluorinated plastic containers into the crop protection agency.”

Kerry,

Hi Nancy,

Thank you so much. I do have one more question I was wondering if you could address:

Ex. 5 Deliberative Process (DP)

Here is the link to the Qs&As again, just in case you want to take another look:

Hi Rhina,

I'm glad that it was helpful. The changes that you made to that question look great.

Hi Rhina,

I will take a look at the full Q&As next but wanted to share this information with you quickly. The Ag Container Recycling Council has a letter on their web site that addresses this. See the second item at <https://www.acrecycle.org/library>.

Subject: PFAS Anvil Question

Hi Nancy,

I hope you are doing well! I am currently working on communications materials surrounding the PFAS Anvil issue. Rick reviewed our draft Qs&As and mentioned you might be able to provide input on one of our answers regarding fluorinated storage containers. He said there is some information from the ACRC that could inform our answer. Here is the particular question and current draft answer:

How common is the use of fluorinated containers for storage of pesticides and other products? Does this problem extend beyond Anvil?

Ex. 5 Deliberative Process (DP)

You can access the full Qs&As document here:
